A Software Engineer with over two years of experience in developing efficient, scalable, and user-friendly software solutions. Currently working at PT. Akhdani Reka Solusi and open to remote, freelance, or part-time, as well as new opportunities that support professional growth and long-term career development. Skilled in identifying and fixing software bugs. Proficient in developing web-based applications, desktop applications, and data processing systems. Experienced in building and consuming APIs, managing databases, implementing state management, configuring authentication mechanisms including Single Sign-On (SSO), and optimizing application performance. Able to adapt quickly to new technologies, and collaborative in team environments.
